

Out of 49

1			
a/2	b/2	c/3	d/3
<p>Solution could have been simplified further</p> <p>Solution is correct and explanation provided but no proof is given</p> <p>Solution given but not well justified and no proof is attempted</p>			
2	1	2	1

2			
a/2	b/2	c/2	d/2
<p>Would have preferred if you had used the given abbreviations to arrive at the equivalences rather than the other way</p>			
2	2	2	2

3	
a/3	b/2
<p>By the argument you have presented in a, the example holds. However, it would be better to make the reasoning explicit (even if has already been stated) in every question</p>	
3	2

4	
/5	
<p>Everything is correct, but the proof for the final statement (though it follows a similar form to before) is not given.</p>	
4	

5	
a/2	b/2
2	2

6	7	8
/6	/6	/5
<p>Idea is correct but proof is lacking</p>		<p>Inductions are correct, but no comment is made resolving the apparent contradiction.</p>
